

Call for Papers: Congress 2023 Abstract Outline Requirements

Abstract structure

The abstract must consist of 2,500 to 4,500 characters (incl. blank space).

1. Title

The title of the abstract should reflect the content as closely as possible.

2. Introduction, motivation and objective

In this part a short introduction into the topic, as well as the motivation for the development or the use of software or an organizational process is to be given. Possible questions are to be expounded and answered as part of the presentation.

3. Material, methods and tools

In this part, the methods and tools used for analysis, selection and implementation or realization shall be presented shortly.

4. Description of the solution (application software/ application or implementation concept)

In this part the deployed application software/ application respectively the essential functions for the presentation are to be described briefly. A concise overview of the entire scope of functions could also be incorporated here. For presentations that introduce conceptual approaches (e.g., implementation or organizational concepts), the corresponding concepts should be presented here in detail.

5. Results, experiences and "lessons learned"

An essential aspect of the DMEA congress is to inform the participants about specific aspects or experiences in the use of software products or documentation and organizational concepts. Connected with the objective, this chapter of the abstract is the core of what is to be communicated into the industry. Each member of the audience should return from the congress with new insights and experiences. Therefore, it should be described what status has currently been achieved through the use of the solution presented, what experiences have been made during its selection, implementation and operation, and what "lessons" have been learned in the process: What should other users, who are planning a similar project, necessarily take into account? Always remember, as the presenter, you are the expert who wants to and can competently help the audience or readers to master the tasks ahead of them by means of your contribution to the DMEA congress.

6. Discussion and outlook

In this part, the result or what has been achieved should be discussed self-critically and an outlook on future project development or planning will be given.
