The Digital Transformation Offers New Opportunities

conhIT
turns into
DMEA!

DMEA 2019 – Shaping digital healthcare together

DMEA – Connecting Digital Health – continues the 11-year success story of conhIT with a new name and a broader concept. As the main platform for digital healthcare it brings together IT companies, institutions and policymakers with potential customers, industry professionals and newcomers.

From 9 to 11 April 2019 Europe's leading event for digital health will provide a comprehensive market overview, combined with a wide range of interactive formats and training opportunities. Its intersectoral approach offers a platform for new ideas and an in-depth exchange of views. And naturally every digital technology that is rapidly changing our world will be discussed there.

DMEA focuses on the entire digital supply chain of the healthcare system. Those aiming to actively shape the future can network there with industry partners, make use of the unparalleled information on offer – and present their products and solutions. Apply now to make sure of your exhibition area.

___ DMEA – the Perfect Platform for a Changing Industry

DMEA – Digital Medical Expertise & Applications

DMEA sets the pace and shows the way for the digital transformation of the healthcare system. As the industry's trendsetter it promotes digital networking throughout the entire medical supply chain. Due to the close cooperation among players from every healthcare sector the event is Europe's most forward-looking health IT platform.

From 9 to 11 April 2019, as at conhIT, companies exhibiting at DMEA in Berlin can benefit from the unique combination of a Trade Fair, Congress, Academy and interactive events under one roof.

DMEA offers a range of opportunities for dialogue between manufacturers and users. The Congress, which features high-ranking experts, provides a platform for presenting and discussing the latest topics. At the Academy seminars, under the supervision of experienced experts, suppliers and users can examine concrete solutions to practical issues. At the Startup-Café and on the interactive stages fascinating business ideas and a wide range of pitches provide useful information in an entertaining manner. New audiences are also being targeted, with special formats for doctors and nursing staff ensuring a productive exchange of knowledge.

In short, DMEA 2019 provides exhibitors with ideal opportunities for an intersectoral exchange of views – as well as good business.

Visitors to conhIT 2018 made use of many opportunities to enter discussions with manufacturers. Each professional there spent an average 1.7 days gaining inspiration at the event.

Welcome to the Health Market of the Future

Four Exhibition Halls offer a wealth of inspiration and interaction

With its wide range of services, fascinating information events and a broader concept, DMEA is a big attraction for many exhibitors. Be they market leaders, SMEs, startups, manufacturers, associations, universities, consultants, IT security or nursing professionals, for those in search of realising their potential in the digital healthcare market the Berlin Exhibition Halls are where they will find the right audience. By the way, applicants for a Gold, Silver or Bronze Partner Package will receive preferential stand allocations.
